

After Sun Cream with Wasabi Extract

Description:

Fresh after sun cream to repair, sooth and moisturize the skin after a day of sunbathing. This light After Sun Cream is based on the exotic Wasabi extract, which has excellent anti-inflammatory properties as it calms the skin after being exposed to sunlight. Vegetable Melanin is a natural antioxidant and it mimics our own skin melanin terminating the activity of free radicals. Various natural oils pamper the skin and they reduce the damages induced by harmful UV light.

Instructions:

Apply on the cleansed facial skin after a day of sunbathing. Ideal for dry and brittle skin types as it offers moisture and skin repair. Can be used as an every day treatment in summer time.
